

# Clinical Waste & Washroom

We supply a wide range of clinical waste sacks that comply with the UN 3291 carriage of dangerous good regulations. Our yellow clinical waste sacks are for incineration only, designed to mitigate high-risk infectious material. Orange waste bags are used in the collection of infectious waste destined for alternative treatment or incineration such as dressings, swabs, gloves and gowns. Tiger stripe sacks used in the disposal of offensive waste available either on rolls or loose packed.

Sanicare® bin liners offer a hygienic solution for the disposal of sanitary waste products. The liners incorporate Biomaster® anti-microbial product protection that is proven to reduce the bacterial levels on the liners by up to 99.9%. The addition of a floral scented additive helps to suppress any unpleasant odours that may exist.

Product Code	Description	Size (mm)	Size (")	Packing Info	Recycled Content
